## Critical Beings: Law, Nation, and the Global Subject (Law, Justice and Power)

The role of such people as the refugee, the immigrant and the subjugated minority is explored in this book, together with their attendant legal regimes, in the persistent but ever unsettled processes of national/global formation. Challenging accounts that would ascribe to them a transitory or incidental place in the establishment of the modern juridical order, the collection argues that these excluded or marginalized people are coming to form a new entity - the global legal subject - comparable in ways to other non-state actors operating in the international legal system. The collection shows how the global legal subject is integral to and constituent of the processes of state and global formation yet also disruptive of them. It maintains that these global subjects stand as possible precursors to new political ways of being. This book makes a contribution to debates on law and globalization, and could be of interest to those concerned with law and the movement of people, law and the formation of identities and law and human rights.
