The Coming Age of Scarcity: Preventing Mass Death and Genocide in the Twenty-First Century (Syracuse Studies on Peace and Conflict Resolution) Michael Dobkowski

Michael Dobkowski and Isidor Wallimann have edited a book that, although ominous, is not a fatalistic look at the future. The Coming Age of Scarcity lays out the perils of not recognizing the reality of genocide or of acknowledging the full implications of warfare. Showing how scarcity and surplus populations can lead to disaster, The Coming Age of Scarcity is about evil. It tells of "ethnic cleansing" and excavates the world's expanding killing fields. The writers in this volume are all too aware that the future suggests that present-day population growth, land resources, energy consumption, and per capita consumption cannot be sustained without leading to greater catastrophes. The essays in this volume ask: What is the solution in the face of mass death and genocide?
