The Computational Nature of Language Learning and Evolution (Current Studies in Linguistics)

Partha Niyogi

The nature of the interplay between language learning and the evolution of a language over generational time is subtle. We can observe the learning of language by children and marvel at the phenomenon of language acquisition; the evolution of a language, however, is not so directly experienced. Language learning by children is robust and reliable, but it cannot be perfect or languages would never change -- and English, for example, would not have evolved from the language of the Anglo-Saxon Chronicles. In this book Partha Niyogi introduces a framework for analyzing the precise nature of the relationship between learning by the individual and evolution of the population.

Learning is the mechanism by which language is transferred from old speakers to new. Niyogi shows that the evolution of language over time will depend upon the learning procedure -- that different learning algorithms may have different evolutionary consequences. He finds that the dynamics of language evolution are typically nonlinear, with bifurcations that can be seen as the natural explanatory construct for the dramatic patterns of change observed in historical linguistics. Niyogi investigates the roles of natural selection, communicative efficiency, and learning in the origin and evolution of language -- in particular, whether natural selection is necessary for the emergence of shared languages.

Over the years, historical linguists have postulated several accounts of documented language change. Additionally, biologists have postulated accounts of the evolution of communication systems in the animal world. This book creates a mathematical and computational framework within which to embed those accounts, offering a research tool to aid analysis in an area in which data is often sparse and speculation often plentiful.

From reader reviews:

Priscilla Jefferson:

What do you in relation to book? It is not important with you? Or just adding material when you require something to explain what your own problem? How about your free time? Or are you busy person? If you don't have spare time to complete others business, it is give you a sense of feeling bored faster. And you have free time? What did you do? Every person has many questions above. They have to answer that question simply because just their can do that. It said that about reserve. Book is familiar on every person. Yes, it is correct. Because start from on kindergarten until university need this specific The Computational Nature of Language Learning and Evolution (Current Studies in Linguistics) to read.

Robin Harvey:

Hey guys, do you desires to finds a new book to read? May be the book with the headline The Computational Nature of Language Learning and Evolution (Current Studies in Linguistics) suitable to you? Often the book was written by popular writer in this era. The actual book untitled The Computational Nature of Language Learning and Evolution (Current Studies in Linguistics)is one of several books that everyone read now. This kind of book was inspired many people in the world. When you read this reserve you will enter the new age that you ever know before. The author explained their concept in the simple way, and so all of people can easily to recognise the core of this e-book. This book will give you a lot of information about this world now. To help you see the represented of the world with this book.

Tamica Harris:

Playing with family inside a park, coming to see the water world or hanging out with buddies is thing that usually you might have done when you have spare time, and then why you don't try issue that really opposite from that. One activity that make you not sensation tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of knowledge. Even you love The Computational Nature of Language Learning and Evolution (Current Studies in Linguistics), you could enjoy both. It is great combination right, you still wish to miss it? What kind of hang type is it? Oh occur its mind hangout folks. What? Still don't buy it, oh come on its referred to as reading friends.

Bernice Smith:

Reading a book being new life style in this calendar year; every people loves to learn a book. When you go through a book you can get a great deal of benefit. When you read guides, you can improve your knowledge, since book has a lot of information into it. The information that you will get depend on what kinds of book that you have read. In order to get information about your analysis, you can read education books, but if you want to entertain yourself you can read a fiction books, this sort of us novel, comics, along with soon. The The Computational Nature of Language Learning and Evolution (Current Studies in Linguistics) provide you with a new experience in reading a book.
