ASP.NET 2.0 is Microsoft's principal standard for creating dynamic web pages on the Windows platform. ASP.NET 2.0 boasts a range of important new features that make it superior to any Windows web-presentation technology that has come before it. A few of these are:

- **Masterpages** let you define your sites look and feel once and apply it across all your web forms.
- **Themes and skins** make for easy customization of your sites look and feel. Generics these much vaunted new additions to the .NET Framework allow you to create a data structure without committing to a specific data type they'll revolutionize the way you code
- **Personalization** ASP.NET 2.0 makes it easier than ever before to create customized experiences tailored for individual users.

These, combined with improvements in everything from speed (ASP.NET 2.0 pages are faster to both write and serve), administration , data access, security and scalability make ASP.NET 2.0 the leading force in .NET web development.

Seasoned .NET professionals **Matthew MacDonald** and **Mario Szpuszta** explain how you can get the most from this ground-breaking new technology. They cover ASP.NET 2.0 as a whole, illustrating both the brand-new features and the functionality carried over from previous versions of ASP. This book will give you the knowledge you need to code real ASP.NET 2.0 application in the best possible style.
