Conformal Field Theory, Automorphic Forms and Related Topics: CFT, Heidelberg, September 19-23, 2011 (Contributions in Mathematical and Computational Sciences)
This book, part of the series Contributions in Mathematical and Computational Sciences, reviews recent developments in the theory of vertex operator algebras (VOAs) and their applications to mathematics and physics.

The mathematical theory of VOAs originated from the famous monstrous moonshine conjectures of J.H. Conway and S.P. Norton, which predicted a deep relationship between the characters of the largest simple finite sporadic group, the Monster and the theory of modular forms inspired by the observations of J. MacKay and J. Thompson.

The contributions are based on lectures delivered at the 2011 conference on Conformal Field Theory, Automorphic Forms and Related Topics, organized by the editors as part of a special program offered at Heidelberg University that summer under the sponsorship of the Mathematics Center Heidelberg (MATCH).

From reader reviews:

Daniel Hartung:

What do you think about book? It is just for students because they are still students or that for all people in the world, the particular best subject for that? Just simply you can be answered for that issue above. Every person has various personality and hobby for each other. Don't to be compelled someone or something that they don't desire do that. You must know how great and important the book Conformal Field Theory, Automorphic Forms and Related Topics: CFT, Heidelberg, September 19-23, 2011 (Contributions in Mathematical and Computational Sciences). All type of book are you able to see on many solutions. You can look for the internet methods or other social media.

Ethelyn Allen:

What do you concerning book? It is not important to you? Or just adding material when you really need something to explain what yours problem? How about your extra time? Or are you busy individual? If you don't have spare time to accomplish others business, it is give you a sense of feeling bored faster. And you have spare time? What did you do? Every person has many questions above. They need to answer that question since just their can do in which. It said that about reserve. Book is familiar on every person. Yes, it is proper. Because start from on guardería until university need this particular Conformal Field Theory, Automorphic Forms and Related Topics: CFT, Heidelberg, September 19-23, 2011 (Contributions in Mathematical and Computational Sciences) to read.

Janelle Coe:

Reading a book to be new life style in this calendar year; every people loves to read a book. When you learn a book you can get a large amount of benefit. When you read guides, you can improve your knowledge, due to the fact book has a lot of information on it. The information that you will get depend on what kinds of book that you have read. If you would like get information about your review, you can read education books, but if you act like you want to entertain yourself look for a fiction books, these kinds of us novel, comics, and also soon. The Conformal Field Theory, Automorphic Forms and Related Topics: CFT, Heidelberg, September 19-23, 2011 (Contributions in Mathematical and Computational Sciences) provide you with a new experience in looking at a book.

Julie Long:

As a university student exactly feel bored to reading. If their teacher expected them to go to the library or make summary for some e-book, they are complained. Just small students that has reading's heart and soul or real their leisure activity. They just do what the instructor want, like asked to go to the library. They go to there but nothing reading significantly. Any students feel that looking at is not important, boring in addition to can't see colorful pics on there. Yeah, it is being complicated. Book is very important for yourself. As we

know that on this age, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. Therefore this Conformal Field Theory, Automorphic Forms and Related Topics: CFT, Heidelberg, September 19-23, 2011 (Contributions in Mathematical and Computational Sciences) can make you sense more interested to read.
