Green Building Illustrated

Francis D. K. Ching, Ian M. Shapiro

Green Building Illustrated Francis D. K. Ching, Ian M. Shapiro

“*Green Building Illustrated* is a must-read for students and professionals in the building industry. The combination of incredibly expressive illustrations and accessible technical writing make concepts of green building on paper as intuitive as they would be if you toured a space with experts in sustainable building.” —**Rick Fedrizzi, President, CEO, and Founding Chair of the U.S. Green Building Council**

“The authors of *Green Building Illustrated* deliver clear and intelligent text, augmented by straightforward but compelling illustrations describing green building basics. This comprehensive book covers everything from the definition of green building, to details of high performance design, to sensible applications of renewable energy. This is a book with appeal for all architects and designers, because it addresses general principles such as holistic and integrated design, along with practical realities like affordability and energy codes. *Green Building Illustrated* describes a pathway for reaching *Architecture 2030*'s carbon emission reduction targets for the built environment.”—**Ed Mazria, founder of Architecture 2030**

“...a neophyte will have a very good overview of all the factors involved in green building. I see some excellent pedagogy at work!”

— **Jim Gunshinan, Editor, Home Energy Magazine**

Francis D.K. Ching brings his signature graphic style to the topic of sustainable design

In the tradition of the classic *Building Construction Illustrated*, Francis D.K. Ching and Ian M. Shapiro offer a graphical presentation to the theory, practices, and complexities of sustainable design using an approach that proceeds methodically. From the outside to the inside of a building, they cover all aspects of sustainability, providing a framework and detailed strategies to design buildings that are substantively green. The book begins with an explanation of why we need to build green, the theories behind it and current rating systems before moving on to a comprehensive discussion of vital topics. These topics include site selection, passive design using building shape, water conservation, ventilation and air quality, heating and cooling, minimum-impact materials, and much more.

- Explains the fundamental issues of sustainable design and construction in a beautifully illustrated format
- Illustrated by legendary author, architect, and draftsman Francis D.K. Ching, with text by recognized engineer and researcher Ian M. Shapiro
- Ideal for architects, engineers, and builders, as well as students in these fields

Sure to be the standard reference on the subject for students, professionals, and anyone interested in sustainable design and construction of buildings, *Green Building Illustrated* is an informative, practical, and graphically beautiful resource.

From reader reviews:

Raymond Lee:

Information is provisions for people to get better life, information these days can get by anyone on everywhere. The information can be a knowledge or any news even a problem. What people must be consider when those information which is in the former life are hard to be find than now's taking seriously which one would work to believe or which one the resource are convinced. If you find the unstable resource then you have it as your main information we will see huge disadvantage for you. All those possibilities will not happen inside you if you take Green Building Illustrated as the daily resource information.

Peggy Mitchum:

You could spend your free time to read this book this book. This Green Building Illustrated is simple to develop you can read it in the park, in the beach, train and soon. If you did not include much space to bring often the printed book, you can buy the actual e-book. It is make you easier to read it. You can save the actual book in your smart phone. Thus there are a lot of benefits that you will get when one buys this book.

Brian Seery:

A lot of publication has printed but it differs. You can get it by web on social media. You can choose the most beneficial book for you, science, amusing, novel, or whatever by means of searching from it. It is known as of book Green Building Illustrated. You'll be able to your knowledge by it. Without making the printed book, it could possibly add your knowledge and make a person happier to read. It is most critical that, you must aware about reserve. It can bring you from one destination for a other place.

Duane Zook:

What is your hobby? Have you heard that will question when you got students? We believe that that concern was given by teacher to the students. Many kinds of hobby, Everyone has different hobby. So you know that little person just like reading or as looking at become their hobby. You should know that reading is very important along with book as to be the issue. Book is important thing to provide you knowledge, except your personal teacher or lecturer. You discover good news or update in relation to something by book. Different categories of books that can you decide to try be your object. One of them are these claims Green Building Illustrated.
