Matrix Computations (Johns Hopkins Studies in the Mathematical Sciences)

Gene H. Golub, Charles F. Van Loan

Matrix Computations (Johns Hopkins Studies in the Mathematical Sciences) Gene H. Golub, Charles F. Van Loan

The fourth edition of Gene H. Golub and Charles F. Van Loan's classic is an essential reference for computational scientists and engineers in addition to researchers in the numerical linear algebra community. Anyone whose work requires the solution to a matrix problem and an appreciation of its mathematical properties will find this book to be an indispensable tool.

This revision is a cover-to-cover expansion and renovation of the third edition. It now includes an introduction to tensor computations and brand new sections on • fast transforms• parallel LU• discrete Poisson solvers• pseudospectra• structured linear equation problems• structured eigenvalue problems• large-scale SVD methods• polynomial eigenvalue problems

Matrix Computations is packed with challenging problems, insightful derivations, and pointers to the literature?everything needed to become a matrix-savvy developer of numerical methods and software.

From reader reviews:

William Fuller:

Book is definitely written, printed, or created for everything. You can learn everything you want by a book. Book has a different type. We all know that that book is important matter to bring us around the world. Next to that you can your reading talent was fluently. A publication Matrix Computations (Johns Hopkins Studies in the Mathematical Sciences) will make you to always be smarter. You can feel considerably more confidence if you can know about anything. But some of you think that will open or reading some sort of book make you bored. It is not necessarily make you fun. Why they could be thought like that? Have you looking for best book or suitable book with you?

Irene Justice:

This Matrix Computations (Johns Hopkins Studies in the Mathematical Sciences) are usually reliable for you who want to be described as a successful person, why. The main reason of this Matrix Computations (Johns Hopkins Studies in the Mathematical Sciences) can be one of many great books you must have is definitely giving you more than just simple reading food but feed an individual with information that maybe will shock your preceding knowledge. This book will be handy, you can bring it all over the place and whenever your conditions in e-book and printed types. Beside that this Matrix Computations (Johns Hopkins Studies in the Mathematical Sciences) giving you an enormous of experience including rich vocabulary, giving you tryout of critical thinking that could it useful in your day activity. So , let's have it and enjoy reading.

Mikel Davis:

The publication with title Matrix Computations (Johns Hopkins Studies in the Mathematical Sciences) has a lot of information that you can discover it. You can get a lot of help after read this book. This book exist new expertise the information that exist in this reserve represented the condition of the world currently. That is important to yo7u to understand how the improvement of the world. This specific book will bring you with new era of the the positive effect. You can read the e-book on your smart phone, so you can read it anywhere you want.

Irving Tarkington:

Reading a book for being new life style in this year; every people loves to examine a book. When you go through a book you can get a wide range of benefit. When you read ebooks, you can improve your knowledge, since book has a lot of information onto it. The information that you will get depend on what forms of book that you have read. If you wish to get information about your review, you can read education books, but if you want to entertain yourself read a fiction books, these us novel, comics, along with soon. The Matrix Computations (Johns Hopkins Studies in the Mathematical Sciences) will give you new experience in examining a book.
