C++ How to Program (10th Edition) Paul Deitel, Harvey Deitel

C++ How to Program presents leading-edge computing technologies in a friendly manner appropriate for introductory college course sequences, *based on the curriculum recommendations of two key professional organizations—the ACM and the IEEE.*

The best-selling *C++ How to Program* is accessible to readers with little or no programming experience, yet comprehensive enough for the professional programmer. The Deitels' signature live-code approach presents the concepts in the context of full working programs followed by sample executions. The early objects approach gets readers thinking about objects immediately—allowing them to more thoroughly master the concepts. Emphasis is placed on achieving program clarity and building well-engineered software. Interesting, entertaining, and challenging exercises encourage students to make a difference and use computers and the Internet to work on problems. To keep readers up-to-date with leading-edge computing technologies, the **Tenth Edition** conforms to the C++11 standard and the new C++14 standard.

Also available with MyProgrammingLab™

This title is also available with MyProgrammingLab—an online learning system designed to engage students and improve results. MyProgrammingLab consists of a set of programming exercises correlated to the programming concepts in this book. Through hundreds of practice problems, the system automatically detects errors in the logic and syntax of their code submissions and offers targeted hints that enable students to figure out what went wrong—and why. MyProgrammingLab improves the programming competence of beginning students who often struggle with the basic concepts and paradigms of popular high-level programming languages. For instructors, a comprehensive gradebook tracks correct and incorrect answers and stores the code inputted by students for review.

Note: You are purchasing a standalone product; MyProgrammingLab does not come packaged with this content. Students, if interested in purchasing this title with MyProgrammingLab, ask your instructor for the correct package ISBN and Course ID. Instructors, contact your Pearson representative for more information.
