Daniel Minoli

Innovations in Satellite Communication and Satellite Technology Daniel Minoli

Surveys key advances in commercial satellite communications and what might be the implications and/or opportunities for end-users and service providers in utilizing the latest fast-evolving innovations in this field

This book explores the evolving technical options and opportunities of satellite networks. Designed to be a self-contained reference, the book includes background technical material in an introductory chapter that will serve as a primer to satellite communications. The text discusses advances in modulation techniques, such as DBV-S2 extensions (DVS-S2X); spotbeam-based geosynchronous and medium earth orbit High Throughput Satellite (HTS) technologies and Internet applications; enhanced mobility services with aeronautical and maritime applications; Machine to Machine (M2M) satellite applications; emerging ultra HD technologies; and electric propulsion. The author surveys the latest innovations and service strategies and the resulting implications, which involves:

- Discussing advances in modulation techniques and HTS spotbeam technologies
- Surveying emerging high speed aeronautical mobility services and maritime and other terrestrial mobility services
- Assessing M2M (machine-to-machine) applications, emerging Ultra HD video technologies and new space technology

Satellite communication is an integral part of the larger fields of commercial, television/media, government, and military communications, because of its multicast/broadcast capabilities, mobility, reliability, and global reach. High Throughput Satellites) are expected to revolutionize the field during this decade, providing very high speed, yet cost-effective, Internet access and connectivity anywhere in the world, in rural areas, in the air, and at sea. M2M connectivity, enabled by satellite communications, connects trucks on transcontinental trips, aircraft in real-time-telemetry aggregation, and mercantile ships.

A comprehensive analysis of the new advances in satellite communications, *Innovations in Satellite Communications Technology* is a reference for telecommunications and satellite providers and end-users, technology investors, logistic professionals, and more.

From reader reviews:

Nancy Fisher:

What do you ponder on book? It is just for students because they are still students or that for all people in the world, what best subject for that? Just you can be answered for that question above. Every person has several personality and hobby per other. Don't to be pushed someone or something that they don't would like do that. You must know how great and also important the book Innovations in Satellite Communication and Satellite Technology. All type of book would you see on many sources. You can look for the internet options or other social media.

Richard Simpson:

The e-book untitled Innovations in Satellite Communication and Satellite Technology is the publication that recommended to you to study. You can see the quality of the reserve content that will be shown to a person. The language that creator use to explained their ideas are easily to understand. The article author was did a lot of exploration when write the book, and so the information that they share to you is absolutely accurate. You also could possibly get the e-book of Innovations in Satellite Communication and Satellite Technology from the publisher to make you much more enjoy free time.

Kimberly Spradlin:

Do you have something that you prefer such as book? The guide lovers usually prefer to pick book like comic, small story and the biggest the first is novel. Now, why not trying Innovations in Satellite Communication and Satellite Technology that give your fun preference will be satisfied simply by reading this book. Reading addiction all over the world can be said as the opportunity for people to know world a great deal better then how they react when it comes to the world. It can't be said constantly that reading behavior only for the geeky particular person but for all of you who wants to be success person. So , for all of you who want to start examining as your good habit, it is possible to pick Innovations in Satellite Communication and Satellite Technology become your starter.

Sunny Lopez:

Is it anyone who having spare time in that case spend it whole day through watching television programs or just laying on the bed? Do you need something new? This Innovations in Satellite Communication and Satellite Technology can be the answer, oh how comes? A fresh book you know. You are therefore out of date, spending your free time by reading in this brand new era is common not a geek activity. So what these guides have than the others?
