Cartridges and Firearm Identification (Advances in Materials Science and Engineering)

Robert E. Walker

Cartridges and Firearm Identification (Advances in Materials Science and Engineering) Robert E. Walker

At a time when crime scene television shows are all the rage amongst the civilian population, knowledge of firearm forensics is of paramount importance to crime scene analysts, police detectives, and attorneys for both the prosecution and the defense. **Cartridges and Firearm Identification** brings together a unique, multidisciplinary approach to questions that arise regarding ammunition and firearms within the context of investigation. Supplying essential practical information about firearms and ammunition in a clear, easy-to-follow format, this volume:

- Defines and depicts photographically all varieties of firearms
- Presents investigative concerns of firearms evidence from the perspectives of evidence preservation and safe handling procedures
- Introduces readers to the standards of measurement used to classify ammunition, including the significance of names, adjectives, and other descriptors used in conjunction with ammunition cartridges
- Categorizes and identifies ammunition head stamps from cartridges produced around the world
- Provides ammunition manufacturing practices for dozens of nations

The text offers a methodology for the identification of unknown firearms as well as ammunition of questioned identity. The author explains the terminology and describes each group of firearms and the aspects that identify the weaponry—including property marks, proof marks, and patent dates. Lavishly illustrated, this comprehensive reference includes case studies to support the text, making it a premier reference for all those responsible for the complicated task of investigating firearms and cartridges.

From reader reviews:

Dorothy Marsh:

Here thing why this kind of Cartridges and Firearm Identification (Advances in Materials Science and Engineering) are different and dependable to be yours. First of all reading through a book is good nevertheless it depends in the content of it which is the content is as delightful as food or not. Cartridges and Firearm Identification (Advances in Materials Science and Engineering) giving you information deeper as different ways, you can find any book out there but there is no reserve that similar with Cartridges and Firearm Identification (Advances in Materials Science and Engineering). It gives you thrill examining journey, its open up your own eyes about the thing that will happened in the world which is might be can be happened around you. It is possible to bring everywhere like in park, café, or even in your way home by train. For anyone who is having difficulties in bringing the printed book maybe the form of Cartridges and Firearm Identification (Advances in Materials Science and Engineering) in e-book can be your option.

Robert Nobles:

Reading a guide tends to be new life style in this era globalization. With reading through you can get a lot of information which will give you benefit in your life. Using book everyone in this world could share their idea. Guides can also inspire a lot of people. A great deal of author can inspire all their reader with their story or even their experience. Not only the storyline that share in the books. But also they write about the information about something that you need example. How to get the good score toefl, or how to teach your kids, there are many kinds of book that exist now. The authors on earth always try to improve their expertise in writing, they also doing some investigation before they write to their book. One of them is this Cartridges and Firearm Identification (Advances in Materials Science and Engineering).

Arthur McLaurin:

Cartridges and Firearm Identification (Advances in Materials Science and Engineering) can be one of your beginner books that are good idea. Most of us recommend that straight away because this e-book has good vocabulary that could increase your knowledge in vocabulary, easy to understand, bit entertaining but nonetheless delivering the information. The author giving his/her effort to set every word into pleasure arrangement in writing Cartridges and Firearm Identification (Advances in Materials Science and Engineering) although doesn't forget the main place, giving the reader the hottest along with based confirm resource data that maybe you can be considered one of it. This great information may drawn you into fresh stage of crucial imagining.

Larry Hayes:

Reading a guide make you to get more knowledge from it. You can take knowledge and information coming from a book. Book is composed or printed or illustrated from each source that will filled update of news. In this modern era like right now, many ways to get information are available for anyone. From media social

similar to newspaper, magazines, science book, encyclopedia, reference book, story and comic. You can add your understanding by that book. Are you ready to spend your spare time to spread out your book? Or just in search of the Cartridges and Firearm Identification (Advances in Materials Science and Engineering) when you necessary it?
