You can download full book free of charge on [basiceconomy.org](http://basiceconomy.org)

We care most on sale of the paper version for 6 PLN, 2 USD, or 1,5 EUR, in bookstores than electronic copies. Its important to give the book to someone else after reading it. Give it to a stranger on a bus stop. only a paper version is a vote that can make a change and be read by many. Anyway, I cant see you giving someone your laptop or tablet.

This short publication is an attempt to reach out to everyone to busy, in the run, minding their own business. I understand most of people don't have the time, or don't want to understand global economy, and that is why he/she unknowingly loses in the global casino, without realizing that he/she is playing. I will try to explain it on this 10 pages about global economics. This passivity and ignorance of voters is the reason why the governments will never have motivation or courage to introduce what this book represents, because not enough voters expect them to do it.

On the first page of this publication (paper version available in bookstores) is a unique number for every book. It is sort of a support referendum. Understanding and support is represented by the number of sold original paper copies.

In this publication we call to level out the imbalance between taxing people, work, real economy (things that cannot run to tax haven's) and inadequate low tax on transactions on financial markets ( because money will always run where the taxes are lower) Unfortunately if such tax will not be imposed at the same time in many countries at once, but i.e. only in EU, than the money will run where there is no tax

Let's compare money in the economy to water in ecosystem. Financial sector are the clouds, and at the moment the dry land is the economy in permanent recession. Dark clouds are overgrown financial markets. Remember, no rain for a long time is as bad as very heavy rain.

Why does money circulate in the financial markets cloud and why does money make money? (And so far despite increasing money supply by central banks there still is no money rain, just darker clouds)
