This book is written as a practical field manual to effective. Each geologist has to develop his/her own techniques and will ultimately be judged on the results. It is also hoped that it will serve as a text, not the process by which these results and reference for students in Applied Geology were reached. In mineral exploration, the only courses of universities and colleges. The book 'right' way of doing anything is the way that aims to outline some of the practical skills that locates ore in the quickest and most cost-effective manner. It is preferable, however, for an individual geologist. It is intended as a practical 'how to' manual to develop his/her own method of operation book, rather than as a text on geological or ore after having tried, and become aware of, those deposit theory. procedures which experience has shown to work. An explorationist is a professional who searches well and which are generally accepted in industry as good exploration practice. For ore bodies in a scientific and structured way. Although an awkward and artificial term, The chapters of the book approximately follow this is the only available word to describe the low the steps which a typical exploration professional would go through. In Chapter 1, the author defines economic mineralization.
