RNA Nanotechnology

RNA Nanotechnology

In the past few decades there has been incredible growth in "bionano"-related research, which has been accompanied by numerous publications in this field. Although various compilations address topics related to deoxyribonucleic acid (DNA) and protein, there are few books that focus on determining the structure of ribonucleic acid (RNA) and using RNA as building blocks to construct nanoarchitectures for biomedical and healthcare applications.

RNA Nanotechnology is a comprehensive volume that details both the traditional approaches and the latest developments in the field of RNA-related technology. This book targets a wide audience: a broad introduction provides a solid academic background for students, researchers, and scientists who are unfamiliar with the subject, while the in-depth descriptions and discussions are useful for advanced professionals.

The book opens with reviews on the basic aspects of RNA biology, computational approaches for predicting RNA structures, and traditional and emerging experimental approaches for probing RNA structures. This section is followed by explorations of the latest research and discoveries in RNA nanotechnology, including the design and construction of RNA-based nanostructures. The final segment of the book includes descriptions and discussions of the potential biological and therapeutic applications of small RNA molecules, such as small/short interfering RNAs (siRNAs), microRNAs (miRNAs), RNA aptamers, and ribozymes.

From reader reviews:

Karen Wilson:

People live in this new day of lifestyle always make an effort to and must have the time or they will get lot of stress from both daily life and work. So , when we ask do people have time, we will say absolutely yes. People is human not really a robot. Then we consult again, what kind of activity have you got when the spare time coming to an individual of course your answer may unlimited right. Then do you ever try this one, reading textbooks. It can be your alternative within spending your spare time, the actual book you have read is definitely RNA Nanotechnology.

Elliot Weber:

Would you one of the book lovers? If so, do you ever feeling doubt if you find yourself in the book store? Try and pick one book that you just dont know the inside because don't evaluate book by its cover may doesn't work is difficult job because you are scared that the inside maybe not seeing that fantastic as in the outside appearance likes. Maybe you answer can be RNA Nanotechnology why because the excellent cover that make you consider with regards to the content will not disappoint a person. The inside or content will be fantastic as the outside or even cover. Your reading sixth sense will directly assist you to pick up this book.

Rose Bennett:

Reading a book to be new life style in this season; every people loves to learn a book. When you go through a book you can get a great deal of benefit. When you read ebooks, you can improve your knowledge, since book has a lot of information in it. The information that you will get depend on what kinds of book that you have read. If you wish to get information about your research, you can read education books, but if you act like you want to entertain yourself look for a fiction books, these us novel, comics, and also soon. The RNA Nanotechnology will give you a new experience in examining a book.

Jessica Hurst:

As a scholar exactly feel bored for you to reading. If their teacher questioned them to go to the library or make summary for some publication, they are complained. Just minor students that has reading's heart and soul or real their interest. They just do what the teacher want, like asked to go to the library. They go to generally there but nothing reading really. Any students feel that reading through is not important, boring and also can't see colorful photographs on there. Yeah, it is to become complicated. Book is very important for you. As we know that on this period of time, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. Therefore this RNA Nanotechnology can make you sense more interested to read.
